Favourable Scenarios	What you might get back after costs	€11,253	€13,536
	Average return each year	12.5%	6.2%

This table shows the money you could get back over the next 5 years (recommended holding period), under different scenarios, assuming that you invest €10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## Performance Scenarios

Recommended holding period: 5 years  
Example Investment: €10,000

		If you exit after 1 year	If you exit after 5 years
Stress Scenarios	What you might get back after costs	€8,350	€8,074
	Average return each year	-16.5%	-4.2%
Unfavourable Scenarios	What you might get back after costs	€9,305	€10,511
	Average return each year	-7%	1%
Moderate Scenarios	What you might get back after costs	€10,409	€12,002
	Average return each year	4.1%	3.7%
Favourable Scenarios	What you might get back after costs	€11,253	€13,536
	Average return each year	12.5%	6.2%

This table shows the money you could get back over the next 5 years (recommended holding period), under different scenarios, assuming that you invest €10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
